Target Role: Aspiring Cloud & Backend Engineer (Python, AWS)

Aspiring Cloud Engineer with a focus on AWS (EC2, S3, IAM) and Python. Developing backend fundamentals and building practical understanding of cloud-based systems. Actively learning, practicing DSA, and preparing for entry-level Cloud/Backend roles.

EDUCATION

Aryabhatta Knowledge University

Bachelor of Computer Applications (CGPA: 8.40/10)

Patna, Bihar

Aug. 2022 – July 2025

R. N College

12th Grade, Biology Stream - 61%

Hajipur, Bihar

2020 – 2022

PROJECTS

• Recipe Book App

July 2025

Built a responsive React.js web app with REST API integration and asynchronous data handling.

- Implemented CRUD functionality with localStorage for persistent data management.
- Optimized the app's architecture for performance using component-based design and efficient state management.
- Tested and optimized the application across multiple browsers and screen sizes to ensure consistent performance.

• Portfolio Website

June 2025

Built a personal portfolio website using React.js, HTML, CSS, and JavaScript to showcase projects and skills.

- Designed and developed a responsive UI with reusable components for improved maintainability.
- Deployed the website on Vercel and maintained version control with GitHub.
- Improved user engagement by implementing modular components and structured content flow.

• Sky-Cast-Weather App

May 2025

Sky-Cast is a real-time weather forecasting web application built for dynamic user-based updates.

- Developed a real-time weather forecasting web application using React.js and Tailwind CSS.
- Implemented location-based weather updates using OpenWeather API for accurate results.
- Handled real-time API responses and error states to ensure reliable weather data display.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, Django (Basics), REST APIs

Cloud & DevOps: AWS (EC2, S3, IAM), Docker (Basics), CI/CD (Basics), Vercel

Databases & OS: MongoDB, SQL(MySQL, PostgreSQL - Basic, Joins, CRUD), Linux(Ubuntu, CentOS - Basic Commands, File System)

Developer Tools: Git, GitHub, VS Code, Postman, PyCharm, IntelliJ

Core Concepts: Data Structures & Algorithms, API Integration, System Design (Basics)

Soft Skills: Problem Solving, Debugging, Communication, Time Management

CERTIFICATIONS

- **AWS Certified Solutions Architect - Associate** (In Progress)
- **IBM Full Stack Software Developer Course** (React, Node.js, MongoDB)
